

NAAN MUDHALVAN – PROFESSIONAL READINESS FOR INNOVATION, EMPLOYMENT AND ENTREPRENEURSHIP

ASSIGNMENT – 2

STUDENT NAME	JEEVAMUGI K
STUDENT ROLL NO	814720104021

QUESTION:

Build Python code, Generate Temperature and Humidity values (Use Random function to generate values) and write a condition to detect an alarm in case of high temperature and high Humidity.

- Example: Temp is greater than 30 c, play alarm sound. Same for humidity.
- Submit the Assignment in PDF format in the Git repo.
- Everyone in the team should submit the assignment as it is an individual task.

Code:

main.py

```
import random
```

```
# Set the threshold values for temperature and humidity
```

```
TEMP_THRESHOLD = 85 # degrees Celsius HUMIDITY_THRESHOLD =  
45 #
```

```
percent
```

```
# Generate a random temperature value between 0 and 100
```

```
degreesCelsius temperature = random.uniform(0, 100)
```

```
print("Temperature:", temperature
```

```
# Generate a random humidity value between 0 and 100percent
```

```
humidity random.uniform(0, 100)print("Humidity:", humidity)
```

```
# Check if either temperature or humidity is above the threshold
```

```
if temperature > TEMP_THRESHOLD:
```

```
print("High temperature alarm!") if
```

```
humidity > HUMIDITY_THRESHOLD:
```

```
print("High humidity alarm!")
```

OUTPUT:

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 import random
2
3 # Set the threshold values for temperature and humidity
4 TEMP_THRESHOLD = 85 # degrees Celsius
5 HUMIDITY_THRESHOLD = 45 # percent
6
7 # Generate a random temperature value between 0 and 50 degrees Celsius
8 temperature = random.uniform(0, 100)
9 print("Temperature:", temperature)
10
11 # Generate a random humidity value between 0 and 100 percent
12 humidity = random.uniform(0, 100)
13 print("Humidity:", humidity)
14
15 # Check if either temperature or humidity is above the threshold
```

The Run tool window at the bottom shows the output of the script:

```
C:\Users\tharu\PycharmProjects\pythonProject1\venv\Scripts\python.exe C:\Users\tharu\PycharmProjects\pythonProject1/main.py
Temperature: 96.3920195244161
Humidity: 49.7415542663319
High temperature alarm!
High humidity alarm!
Process finished with exit code 0
```

The status bar at the bottom indicates the file encoding is UTF-8, the line length is 4 spaces, and the Python version is 3.9.
